# A BILL FOR AN ACT

RELATING TO SUSTAINABLE DEVELOPMENT GOALS.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1           SECTION 1. The legislature finds, as declared in the  
2 Hawaii Commitments presented to the World Conservation Congress  
3 in 2016, that "[w]e must undertake profound transformations in  
4 how human societies live on Earth, with particular attention to  
5 making our patterns of production and consumption more  
6 sustainable. We must recognize that human health and wellbeing  
7 depend on healthy ecosystems. We must recognize that every form  
8 of life has value - regardless of its worth to humans." Hawaii  
9 has been a leader in conservation efforts for decades through  
10 its commitment to environmental and sustainability policies. In  
11 the 1970s, the State enacted the State Environmental Policy,  
12 chapter 344, Hawaii Revised Statutes, as a mechanism to set  
13 environmental goals. While comprehensive, it lacked measurable  
14 indicators and enforcement means. Our understanding of the  
15 challenges facing our natural environment worldwide has changed  
16 remarkably since the 1970s and the laws enacted in Hawaii in  
17 recent decades have served as a starlight for other

1 jurisdictions and set a global example on how to adopt policies  
2 on sustainability. More recently, several approaches to  
3 sustainability have emerged in Hawaii, including the Aloha+  
4 Challenge, the governor's Sustainable Hawaii Initiative, and  
5 other initiatives inspired by the Mālama Honua Worldwide Voyage  
6 and Mālama Hawai'i.

7 In July of 2014, the State launched the *Aloha+ Challenge:*  
8 *He Nohona 'Ae'oaia, A Culture of Sustainability*, a statewide  
9 commitment to sustainability, with the leadership of the  
10 governor, four county mayors, the office of Hawaiian affairs,  
11 the legislature, and Hawai'i Green Growth public-private partners  
12 across the State. The Aloha+ Challenge builds on the State's  
13 history of systems thinking, Hawaiian culture and values, and  
14 successful track record on sustainability to outline six  
15 ambitious goals to be achieved by 2030:

16 (1) Clean energy: Achieve seventy per cent clean energy,  
17 with forty per cent from renewables and thirty per  
18 cent from efficiency;

19 (2) Local food: At least double local food production for  
20 local consumption;

- 1 (3) Natural resource management: Reverse the trend of  
2 natural resource loss mauka to makai by increasing  
3 freshwater security, watershed protection, community-  
4 based marine management, invasive species control, and  
5 restoration of native species;
- 6 (4) Waste reduction: Reduce the solid waste stream prior  
7 to disposal by seventy per cent through source  
8 reduction, recycling, bioconversion, and landfill  
9 diversion methods;
- 10 (5) Smart sustainable communities: Increase livability  
11 and resilience in the built environment through  
12 planning and implementation at the state and county  
13 levels; and
- 14 (6) Green workforce and education: Increase local green  
15 jobs and education to implement these goals.

16 To increase the efforts of the Aloha+ Challenge, the  
17 governor launched the Sustainable Hawaii Initiative in 2016,  
18 which includes five goals:

- 19 (1) Double local food production by 2020;
- 20 (2) Implement Hawaii's interagency biosecurity plan by  
21 2027;

- 1 (3) Protect thirty per cent of the highest priority  
2 watersheds by 2030;
- 3 (4) Manage thirty per cent of nearshore ocean waters by  
4 2030; and
- 5 (5) Achieve one hundred per cent renewable energy in  
6 electricity by 2045.

7 In May of 2014, Hōkūle‘a began a three-year voyage across  
8 the world's oceans carrying the message of Mālama Honua - to  
9 care for the Earth. Building on the legacy of the Polynesian  
10 way finders, the Hōkūle‘a Worldwide Voyage inspired actions of  
11 conservation across the Hawaiian islands and beyond, resulting  
12 in the connection of a lei of aloha around the globe.

13 At the global level, the United Nations Sustainable  
14 Development Goals, the Hawaii Commitments presented to the World  
15 Conservation Congress in 2016, and the Paris Climate Agreement  
16 have been adopted to guide global efforts. The Sustainable  
17 Development Goals, otherwise known as the 2030 Agenda for  
18 Sustainable Development, which were born at the United Nations  
19 Conference on Sustainable Development in Rio de Janeiro in 2012  
20 and came into force in 2015, are a universal call to action to  
21 end poverty, protect the planet, and ensure that all people

1 enjoy peace and prosperity. The seventeen Sustainable  
2 Development Goals are interconnected and work in the spirit of  
3 partnership and pragmatism to make the right choices now to  
4 improve life, in a sustainable way, for future generations.  
5 They provide a clear framework for action to guide countries in  
6 accordance with their own priorities and the environmental  
7 challenges of the world at large. They tackle the root causes  
8 of poverty and unite us to make a positive change for both  
9 people and planet.

10 Dealing with the threat of climate change impacts how we  
11 manage our fragile natural resources. Achieving gender equality  
12 and better health helps eradicate poverty, and fostering  
13 peaceful and inclusive societies will reduce inequalities and  
14 help economies prosper. The Sustainable Development Goals are  
15 voluntary commitments to make the world a better and more  
16 prosperous place.

17 During September 2016, more than ten thousand leaders from  
18 government, civil society, indigenous communities, faith and  
19 spiritual traditions, the private sector, and academia gathered  
20 in Hawaii for a meeting of the International Union for  
21 Conservation of Nature World Conservation Congress. Delegates

1 to the Congress adopted the Hawaii Commitments to achieve the  
2 transformation required to promote a "Culture of Conservation".  
3 The Hawaii Commitments consist of seven identified challenges  
4 and proposed solutions, including:

- 5 (1) Linking spirituality, religion, culture, and  
6 conservation;
- 7 (2) Engaging and empowering youth;
- 8 (3) The challenge of sustaining the global food supply and  
9 conserving nature;
- 10 (4) The challenge of preserving the health of the world  
11 ocean;
- 12 (5) The challenge of ending wildlife trafficking;
- 13 (6) The challenge of engaging with the private sector; and
- 14 (7) The challenge of climate change.

15 The Hawaii Commitments build on the Paris Climate Agreement  
16 and the Sustainable Development Goals to allow different global  
17 voices to come together and find common ground in the spirit of  
18 partnership, collaboration, and sustainability.

19 In order for Hawaii to continue to serve as a starlight for  
20 the rest of the world in setting policies on sustainability and  
21 to serve as a global leader on issues of conservation and

1 sustainability, it is essential that the State demonstrate its  
2 full commitment to its own policies and goals, as well as the  
3 goals set on the international stage at United Nations  
4 conferences and summits on sustainability.

5 Therefore, the purpose of this Act is to codify the State's  
6 commitment to conservation and sustainability by including goals  
7 of the seventeen United Nations Sustainable Development Goals  
8 and indicators, with references to existing state sustainability  
9 programs, in the Hawaii Revised Statutes.

10 SECTION 2. Chapter 226, Hawaii Revised Statutes, is  
11 amended by adding two new sections to be appropriately  
12 designated and to read as follows:

13 "§226- Sustainable development goals; no poverty. In  
14 pursuance of the State's sustainability goals, and  
15 notwithstanding any law to the contrary, all agencies shall,  
16 insofar as practicable, take action to assist the State in  
17 achieving the sustainable development goal of ending poverty in  
18 all its forms everywhere by 2030 by:

19 (1) Eradicating extreme poverty for all people in Hawaii,  
20 currently measured as a family of four living on less  
21 than \$89 a day;

- 1        (2) Reducing at least by half the number of men, women,  
2        and children of all ages living below the federal  
3        poverty level;
- 4        (3) Implementing appropriate social protection systems and  
5        measures for all, including floors, and achieving  
6        substantial coverage of the poor and the vulnerable;
- 7        (4) Ensuring that all individuals, in particular the poor  
8        and the vulnerable, have equal rights to economic  
9        resources, as well as access to basic services,  
10       ownership and control over property, inheritance,  
11       natural resources, appropriate new technology, and  
12       financial services, including microfinance; and
- 13       (5) Building the resilience of the poor and those in  
14       vulnerable situations and reducing their exposure and  
15       vulnerability to climate-related extreme events and  
16       other economic, social, and environmental shocks and  
17       disasters.

18       §226- Sustainable development goals; good health and  
19       well-being. In pursuance of the State's sustainability goals,  
20       and notwithstanding any law to the contrary, all agencies,  
21       insofar as practicable, shall take action to assist the State in

1 achieving the sustainable development goal of ensuring healthy  
2 lives and promoting well-being for all by 2030 by:

3 (1) Ensuring that the state maternal mortality ratio is  
4 less than ten per one hundred thousand live births;

5 (2) Ending preventable deaths of newborns and children  
6 under five years of age, with all counties aiming to  
7 ensure that the neonatal mortality rate does not  
8 exceed four per one thousand live births and the  
9 under-five-years-of-age mortality rate does not exceed  
10 six per one thousand live births;

11 (3) Ending the epidemics of human immunodeficiency virus  
12 (HIV), acquired immune deficiency syndrome (AIDS),  
13 tuberculosis, and neglected tropical diseases, and  
14 combating hepatitis, mumps, rat lung worm disease,  
15 dengue fever, water-borne diseases, and other  
16 communicable diseases;

17 (4) Reducing premature mortality from non-communicable  
18 diseases by one-third, compared to 2018 levels,  
19 through prevention and treatment and promoting mental  
20 health and well-being;

- 1        (5) Strengthening the prevention and treatment of  
2        substance abuse, including narcotic drug and alcohol  
3        abuse;
- 4        (6) Reducing the number of state deaths and injuries from  
5        road traffic accidents by one-half, compared to 2018  
6        levels;
- 7        (7) Ensuring universal access to sexual and reproductive  
8        health care services, including family planning,  
9        information and education, and the integration of  
10       reproductive health into state programs;
- 11       (8) Achieving universal health coverage, including  
12       financial risk protection; access to quality essential  
13       health care services; and access to safe, effective,  
14       quality, and affordable essential medicines and  
15       vaccines for all people in Hawaii;
- 16       (9) Substantially reducing the number of deaths and  
17       illnesses from hazardous chemicals and air, water, and  
18       soil pollution and contamination;
- 19       (10) Substantially reducing tobacco use among persons of  
20       all ages;

1        (11) Substantially increasing health financing and the  
2                    recruitment, development, training, and retention of  
3                    the health workforce in the State, particularly in  
4                    rural areas; and

5        (12) Strengthening the capacity of all counties for early  
6                    warning, risk reduction, and management of national  
7                    and global health risks."

8        SECTION 3. New statutory material is underscored.

9        SECTION 4. This Act shall take effect on July 1, 3000.

**Report Title:**

Sustainable Development Goals; United Nations Goals

**Description:**

Codifies sustainable development goals based on Goal 1, no poverty, and Goal 3, good health and well-being, of the United Nations' Global Goals in the Hawaii State Planning Act. (SB2662 HD1)

*The summary description of legislation appearing on this page is for informational purposes only and is not legislation or evidence of legislative intent.*
