Raytheon Space Business

Controlling the Information Chain

Core Space Markets

Space and Airborne Systems

- Complex, space-qualified EO & RF payloads
 - Hyper-spectral
 - Multi-Spectral
 - Infrared
 - Polarimetric
 - SAR
- Responsive Space payloads
- Small and MicroSat payload
- Space qualified manufacturing
- Algorithm and Software Development
- Modeling & Simulation

Intelligence and Information Systems

- C2
- Mission Management & Integration
- Sensor Data Processing
- Information Management
- Network Management
- Ground Terminals
- Integrated Development & Maintenance Operations/Mission Support

Network Centric Systems

- Space Communications Systems
- Space Communications Payloads
 - Antennas
 - T/R Modules
 - Solid State Power Amplifiers
 - Digital Processors
 - Power Converters
- Remote Sensing Payloads
 - Altimeters
 - Scatterometers
- High-Performance Focal Planes
- GPS Space-Based Augmentation Systems

Core Space Markets (cont'd)

Raytheon Missile Systems

- Missile Defense Conceptual Development
- NASA Space
- Directed Energy
- Non-Lethal Weapons

Integrated Defense Systems

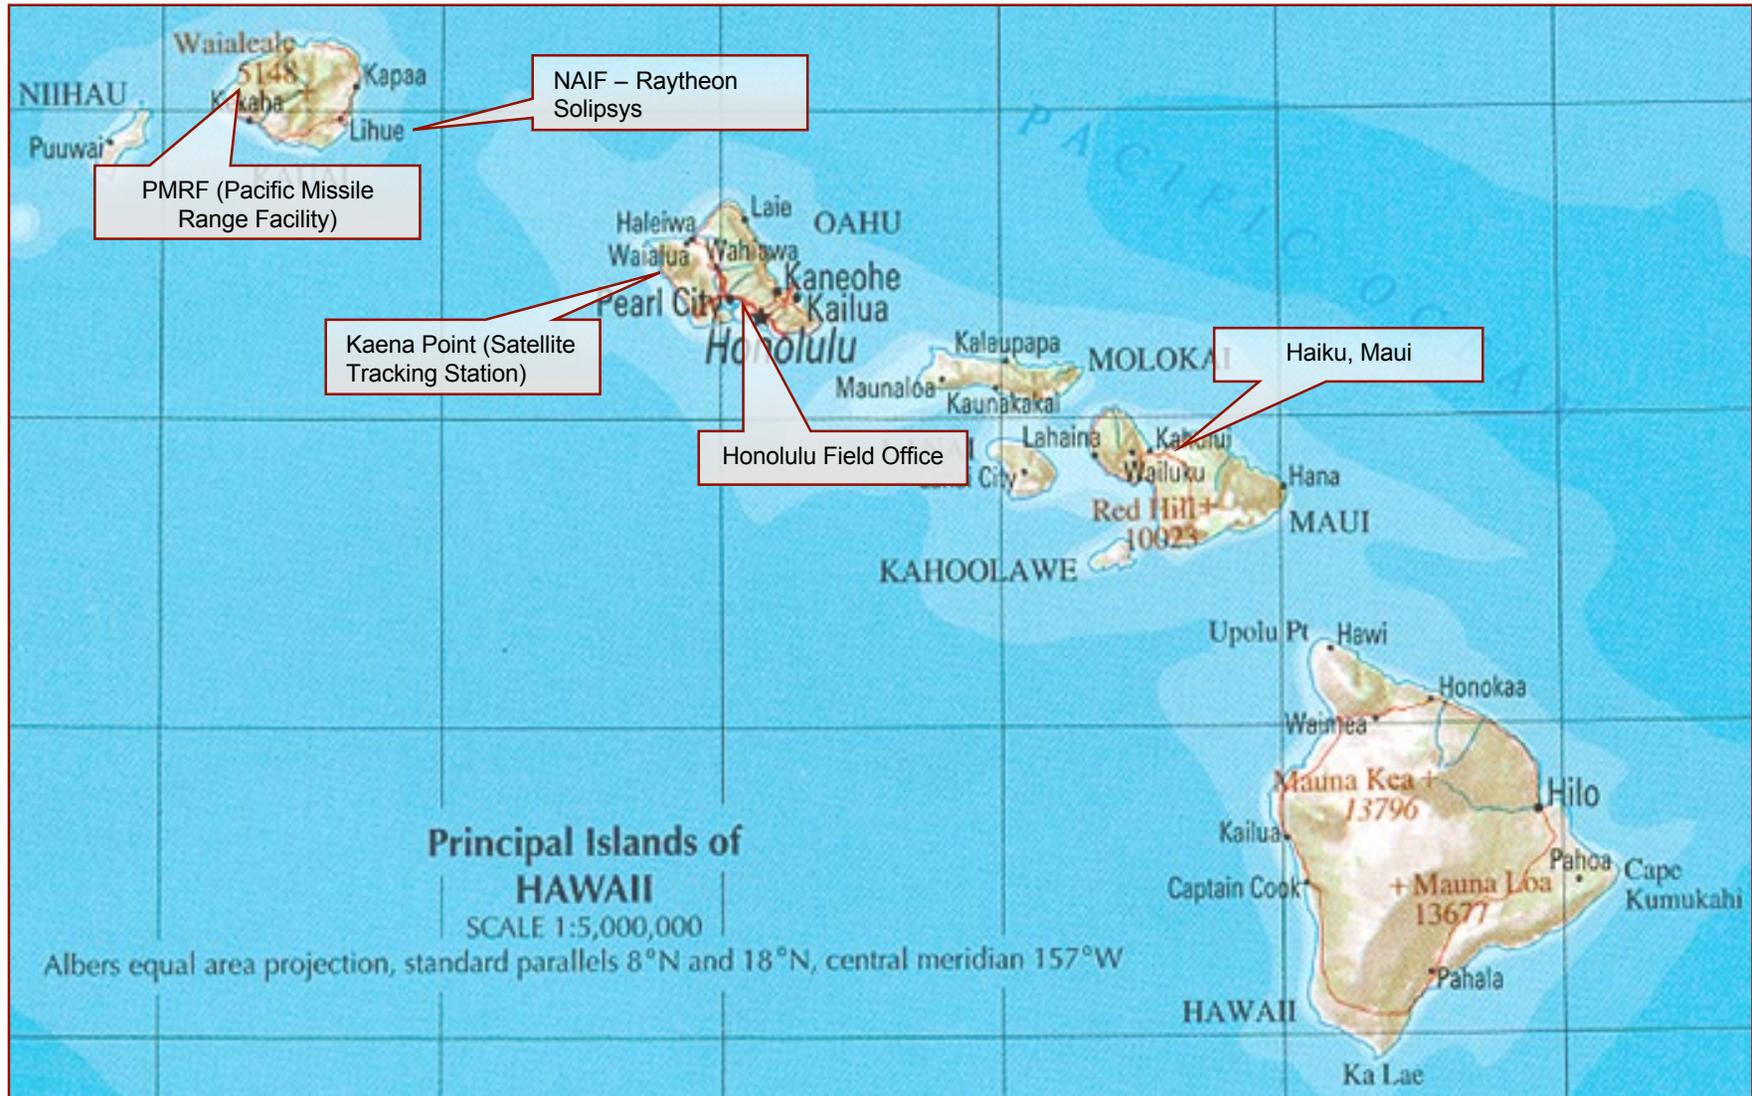

- SSN Sensors
- Sensor-Netting
- Multi-Domain Awareness and Surveillance System Integration
- Control Centers, Control Systems, Mission Applications
- Integrated Systems Development

Raytheon Technical Services Company

- Program Management
- Risk Management
- EVMS
- Lean and Agile, Integrated Supply Chain Systems
- Site Operation and Maintenance
- Property Management
- Modeling and Simulation, virtual training
- Metrology and calibration

Hawaii Employees and Locations

Raytheon Employs approximately 75 People in Hawaii

Why Hawaii

- DoD Customers
- PMRF
- Universities
- Local Tech Companies
- Location (plus's & minus's)
- Unique Geography
- Bridge to Asia Pacific

Many Opportunities to Work with Government and Industry
