Testimony of
SUZANNE D. CASE
Chairperson

Before the House Committee on
TRANSPORTATION

Friday, February 2, 2018
10:30 A.M
State Capitol, Conference Room 423

In consideration of
HOUSE BILL 2500
RELATING TO COASTAL HIGHWAYS

House Bill 2500 proposes to require the Department of Transportation (DOT) to develop a strategic plan to protect coastal highways from the effects of coastal erosion. The Department of Land and Natural Resources appreciates the measure and would aid DOT should DOT endeavor to develop a plan of this type.

Thank you for the opportunity to testify on this measure.
The Department of Transportation (DOT) supports the intent of this bill with concerns.

The DOT is currently working with the Department of Civil and Environmental Engineering of the University of Hawaii on updating the 2003 Statewide Highway Shoreline Protection Study which is a strategic plan that will prioritize coastal highway areas that are at risk to be addressed. This update will consider the effects of current coastal erosion as well as future climate change and sea level rise. The study will consider the information provided by the Sea Level Rise Vulnerability & Adaptation Report (SLR Report) that was submitted to the 2018 Hawaii State Legislature, as well as additional studies previously performed and conducted by the National Oceanic and Atmospheric Administration (NOAA) and the Army Corps of Engineers.

DOT’s updated study will be completed in June 2019. However, we have moved forward with protection of vulnerable roadways using temporary structures to minimize erosion of the roadways.

DOT’s program is focused on preservation and protection of the existing roadway system and facilities. DOT is happy to work with the community and other governmental agencies and organizations to address the beach and shoreline erosion issues. However, DOT does not have sufficient funding to address areas outside of its jurisdiction.

Thank you for the opportunity to provide testimony.
Testimony before the
House Committee on Transportation

February 2, 2018
H.B. No. 2500 – Relating to Coastal Highways
SUPPORT with COMMENTS

By Albert Perez
Executive Director
Maui Tomorrow Foundation, Inc.

COMMITTEE ON TRANSPORTATION
Rep. Henry J.C. Aquino, Chair
Rep. Sean Quinlan, Vice Chair

Aloha Chair Aquino, Vice-Chair Quinlan, and Members of the Committee:

The Maui Tomorrow Foundation SUPPORTS HB 2500, WITH COMMENTS.

This bill requires the Department of Transportation to work in conjunction with the Department of Land and Natural Resources, the School of Ocean and Earth Science and Technology of the University of Hawaii, the county of Maui and federal agencies to develop a strategic plan to protect coastal highways from the effects of coastal erosion and update the plan as needed every five years.

Keeping the existing coastal highway as a two-way thoroughfare is not an option. Due to sea level rise, parts of that roadway will soon be in the ocean. In past years, the standard response of the Department of Transportation was to build a seawall or revetment to protect the existing roadway. These hardened shoreline structures have suffered serious damage, and cost millions of dollars to repair, in an effort that will ultimately prove futile as sea level rises. In addition, the seawalls along Honoapiilani Highway are often overtopped by waves, flooding the highway with salt water, sand and debris, and causing motorists to swerve into the oncoming lane to avoid being doused with corrosive salt water. Hawaiian Monk Seals are known to haul themselves out
on the actual highway pavement when high tides coincide with wave action. These are serious safety hazards that needs to be addressed as soon as possible.

The highway pavement near Mile Marker 14 (just south of Camp Olowalu) is already undermined several feet by erosion, and the guardrail is hanging in the air. One of these days, the southbound lane is going to collapse under a heavy vehicle, and we will be lucky if it does not roll into the ocean.

On the left side of this photo near Milemarker 14 of Honoapiilani Highway, erosion has already undermined the pavement by several feet, almost to the travel lane. The roadway here is in danger of collapse under the weight of heavy vehicles.
At left center of this photo, the guardrail supports are hanging in the air. Erosion has undermined the pavement by several feet in some places. Temporary erosion control bags have been scattered by wave action.
A Hawaiian Monk Seal lies partially on the pavement of Honoapiilani Highway putting itself and passing motorists in danger.
Waves overtop a seawall along Honoapiilani Highway. Vehicles are subjected to saltwater corrosion, and motorists wishing to avoid the salt water often veer into the oncoming lane, creating a serious safety hazard.

Building seawalls at these erosion hotspots is not the answer. Sea level rise will cause any such efforts to be very expensive, and ultimately futile in the long run. Shoreline hardening will also cause our beaches to disappear along with our coastal resources and ocean-related cultural practices. This will also negatively impact our visitor industry. If we do not address this problem, we will end up with a situation in which West Maui residents and visitors will have trouble getting to Lahaina, Kaanapali, and points beyond.

One issue that needs to be addressed in the bill is that of cultural sites and Hawaiian cultural practices. The area mauka of the existing highway does have cane haul roads along much of its length, but there are also archaeological sites and living cultural practitioners who may be impacted by mauka realignment. It is good that the bill names the Department of Land and Natural as a cooperating entity, but there should be specific language added regarding the inclusion of strategies in the plan that will protect and minimize disruption of known or potential archaeological sites, cultural sites, and Hawaiian cultural practitioners.

Mahalo for the opportunity to comment on this important legislation.

PRESENTATION OF THE

OAHU COUNTY COMMITTEE ON LEGISLATIVE PRIORITIES

DEMOCRATIC PARTY OF HAWAII

TO THE COMMITTEE ON TRANSPORTATION

THE HOUSE OF REPRESENTATIVES

TWENTY-NINTH LEGISLATURE

REGULAR SESSION OF 2018

Friday, February 2, 2018

10:30 a.m.

Hawaii State Capitol, Conference Room 423

RE: Testimony in Support of HB 2500, RELATING TO COASTAL HIGHWAYS

To the Honorable Henry J.C. Aquino, Chair; the Honorable Sean Quinlan, Vice-Chair and Members of the Committee on Hawaiian Affairs:

Good morning, my name is Melodie Aduja. I serve as Chair of the Oahu County Committee ("OCC") Legislative Priorities Committee of the Democratic Party of Hawaii. Thank you for the opportunity to provide written testimony on House Bill No. 2500, relating to coastal highways preservation. The OCC Legislative Priorities Committee is in favor of House Bill No. 2500 and support its passage.

House Bill No. 2500, is in alignment with the Platform of the Democratic Party of Hawaii ("DPH"), 2016, as it requires the Department of Transportation to work in conjunction with the Department of Land and Natural Resources, the School of Ocean
and Earth Science and Technology of the University of Hawaii, the county of Maui and federal agencies to develop a strategic plan to protect coastal highways from the effects of coastal erosion and update the plan as needed every five years.

Specifically, the DPH Platform states, “[w]e know that climate change is a real threat to our islands and the world. We strongly urge our candidates and elected official to take immediate action to mitigate and adapt to the consequences of climate change. This includes funding adaptation measures including coastal retreat, effective participation of indigenous peoples in climate change governance and recognition what indigenous, peoples in climate change governance, and recognition that indigenous, local and traditional ecological knowledge is key in climate change adaptation solutions.” (Platform of DPH, P. 8, Lines 435-439 (2016)).

Given that House Bill No. 2500 provides for a strategic plan to protect coastal highways from the effects of coastal erosion, it is the position of the OCC Legislative Committee to support this measure.

Thank you very much for your kind consideration.

Sincerely yours,

/s/ Melodie Aduja

Melodie Aduja, Chair, OCC Legislative Priorities Committee

I support this bill. Please end the practice of coastal hardening and seawalls as a solution to erosion and sea level rise. Coastal realignment needs to be planned for and implemented immediately!

Malama pono,

Kai Nishiki

Comments:
I believe it is imperative that the Department of Transportation works in conjunction with the Department of Land and Natural Resources, the School of Ocean and Earth Science and Technology of the University of Hawaii, the county of Maui and federal agencies to develop a strategic plan to protect coastal highways from the effects of coastal erosion. Sea walls destroy our reef and beaches.
Comments:

The Department of Transportation should be working with these entities to prevent any further destruction to the land and marine/ecosystem on Maui island. Further consultation/brainstorming could save millions of dollars in future construction. Please be advised our roadways are in terrible condition and needs to be carefully managed accordingly.
Comments:

Aloha Representatives,

I am concerned about our coastlines, especially here in West Maui, the erosion is causing many negative effects. Seawalls are exacerbating the problem, it seems that the DOT is not working in coordination with the County or any type of environmental common sense. Please take this into consideration as this bill moves forward. We are facing unprecedented problems and need to develop a collaborative plan for coastal retreat in the face of sea level rise and the erosion we are currently witnessing. Please understand that this erosion that we are currently seeing can be exponentially magnified when high surf coincides with full moon king tides etc or storm surge we need to take coordinated steps to protect our transportation corridors. Mahalo for beginning the work of addressing these changes we face - please continue in a transparent and accountable manner.

Mahalo for your time,

Tamara Paltin West Maui
Please support HB2500! We need our coastal highways protected! The ocean and its coast are major priorities for Hawai‘i and they need to be looked after by the most educated and responsible people and groups. I also feel there should be a native Hawai‘i cultural and ocean expert to help assess the coast line and give valuable Hawaiian perspective. Thank you.
Comments:

Please, HI DoT can NOT continue to harden our shorelines.

Olowalu reef is a precious natural resource. It is alarming to see a hardening project still on the list of projects to harden Honoapiʻilani Hwy between mm13.5 and 14.5. The irreparable harm caused off shore by the last hardening is there to stay. The road MUST be moved.
I support the need for a coastal transportation master plan. Please support this bill.
Aloha, Although there are concerns regarding sand replenishment and the impact on the marine environment, please support HB 2500. Thank you.

Paul Hanada
Aloha,

My name is James Burke. I am a self employed individual conducts training for the National Disaster Preparedness Training Center. One of the courses is a Climate Change Adaptation for the Emergency Services Sector training.

I am testifying on behalf of myself.

I fully support the intent of HB2500. Climate change and it’s harmful effects, such as sea level rise is especially important for projects under the the Hawaii Department of Transportation’s (HDOT) jurisdiction is especially important.

Many of HDOT’s projects have a lengthy planning, design, and construction phase and many of HDOT’s projects last a very long time.

Climate change and its harmful effects, while seemingly evident during recent "King Tide" episodes, the long term effects may be quite onerous.

I fully support HB2500 and applaud your efforts toward helping to make sure Hawaii is safe and secure for all residents and visitors for years to come.

Mahalo

James Burke
