State Capitol, Room 016

H.B. 756, H.D. 1
RELATING TO TRANSPORTATION.

Senate Committee on Judiciary

The Department of Transportation (DOT) **supports** with comments H.B. 756, H.D. 1 to adopt rules prescribing uniform standard and specifications for all traffic control devices and establishing factors to consider when setting a maximum speed limit.

For SECTION 1 relating to uniform standards and specifications, we have the following comments:

1. 19-128 Hawaii Administrative Rules (HAR) as required by 286-8 Hawaii Revised Statutes already provide rules designed to achieve uniform standards in the development and installation of a coordinated system of traffic control devices in the State. In accordance with 19-128 HAR, the DOT and Counties are required to conform to the latest edition of the Manual on Uniform Traffic Control Devices (MUTCD).
2. The Standard Highway Signs (including Pavement Marking & Standard Alphabets) book as referenced in the MUTCD, Hawaii Standard Specifications for Road and Bridge Construction and DOT Standard Plans provide specifications and details for traffic control devices installed on the State Highway System and/or Hawaii's Federal-Aid system.

Thank you for the opportunity to provide testimony.

Chad Taniguchi	Testifying for Hawaii Bicycling League	Support	Yes

Comments:

The Hawaii Bicycling League supports HB756. Excessive speed and drug/alcohol impairment are the leading causes of traffic violence leading to death and injuries. This bill allows DOT and counties to consider crashes and injuries, nearby residential populations, people walking and biking, and other road conditions when weighing the correct speed limit to set. Existing speeds will now be tempered by safety factors. This bill is consistent with the Vision Zero approach to street planning and management—making our streets safe is primary. So we can live our lives without the fear of it being cut short by people who put their convenience above the safety of other road users.

As Kamehameha said more than 200 years ago when he proclaimed the law of the splintered paddle: e hele a moe i ke ala. Come and sleep by the side of our roads/trails and be safe from harm. We all have a right to be safe in our streets.

Subject: Support HB756 HD1

Dear Chair Karl Rhoads, Vice Chair Glenn Wakai, and members of the Senate Committee on Judiciary

My name is Kari Benes and I am the Chair of the Hawaii Strategic Highway Safety Plan (SHSP). The Strategic Highway Safety Plan Core Committee has identified “Lowering Speed Limits” as a priority for 2019.

2017 analysis by Fatality Analysis Reporting System (FARS) ranks Hawaii as the 4th worst in the nation for speed-related driving fatalities.¹ In addition, over the past 10 years, almost half (46%) of Hawaii’s traffic fatalities have been speed-related.

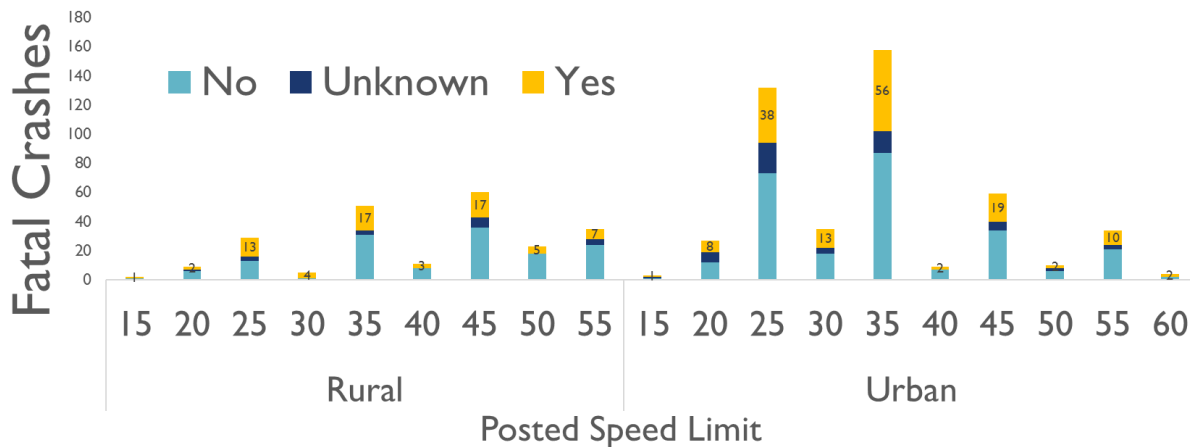

Recently through the data portion of the Strategic Highway Plan update process, the same methodology from the NTSB speed study was applied to Hawaii FARS data.² Hawaii FARS data provides useful characteristics about speed-related crashes on Hawaii’s local roads. For instance, when we compare drivers involved in speed-related crashes with land use

¹ <https://www.ghsa.org/resources/Speeding19>

² <https://www.nts.gov/safety/safety-studies/Documents/ss1701.pdf>

and posted speed limit, we find majority of our speed-related crashes are in our urban areas with a posted speed of 35MPH then 25MPH.

Source: FARS 2012-2016. total drivers= 704, Total drivers Speed-Related = 221.

HB756 HD1 provides a process to take into consideration crash data in determining posted speed limits and looking at addressing speed from a comprehensive view point. Cities like Boston, Portland and New York have benefited with a state level change to setting speed limits and managing speeding.³ Adjusting speed limits, speed enforcement and public communication are best practices outlined by FHWA and in NHTSA's Countermeasures That Work.

The Hawaii Strategic Highway Safety Plan's vision is that all of Hawaii's road users arrive safely at their destinations. You can help us achieve our goal of reducing yearly fatalities, by supporting this measure.
