Date: 02/11/2020
Time: 10:40 AM
Location: 211
Committee: Senate Ways and Means

Department: Education

Person Testifying: Dr. Christina M. Kishimoto, Superintendent of Education

Title of Bill: SB 2057, SD1 RELATING TO EDUCATION.

Purpose of Bill: Gives a preference to students who live within the service area of a school or who enrolled in the school the previous school year who apply for participation in a career and technical education program offered by that school; establishes enrollment in a career and technical education program as a new exception to the requirement to attend school within the service area in which they reside.

Department's Position:
The Department of Education (Department) respectfully offers comments on SB 2057, SD1 which creates an exception for Career and Technical Education (CTE) students to attend a school outside the service area in which those students reside.

Student choice is an essential part of student voice and equity in education. Students will have an opportunity to participate in a CTE program that may not be offered at their home school. The Department is strongly committed to supporting, strengthening, and advancing students for college and career.

The Department already allows and has a process for Geographical Exceptions, which includes the ability to consider a student outside of their service area based on capacity.

Thank you for this opportunity to provide testimony on SB 2057, SD1.

The Hawai‘i State Department of Education is committed to delivering on our promises to students, providing an equitable, excellent, and innovative learning environment in every school to engage and elevate our communities. This is achieved through targeted work around three impact strategies: school design, student voice, and teacher collaboration. Detailed information is available at www.hawaiipublicschools.org.
TESTIMONY BEFORE THE SENATE COMMITTEE ON WAY & MEANS

RE: SB 2057, SD1 - RELATING TO EDUCATION

TUESDAY, FEBRUARY 11, 2020

COREY ROSENLEE, PRESIDENT
HAWAII STATE TEACHERS ASSOCIATION

Chair Dela Cruz, and Members of the Committee:

The Hawaii State Teachers Association supports SB 2057, SD1, relating to education.

According the Hawaii State Department of Education, “Career and Technical Education is an educational structure that allows students the opportunity to explore and learn through the practical application of academic and technical skills and knowledge. The support and involvement of business and industry in CTE is critical to the preparation of tomorrow’s skilled workforce.”

Yet, there is concern among CTE stakeholders (teachers, industry experts, and employers) about the lack of CTE inclusion in federal education legislation. As a result of the federal emphasis on high stakes accountability over the past decade, secondary schools across the state have diverted CTE funding to core content areas, especially English Language Arts and mathematics, and have cut or reduced courses in CTE, or vocational classes that support developing highly skilled labor needed in current industries, that would prepare many of our students for careers that don’t require a college degree, but instead require very specific skills and training in these various industries.

A majority of all current job openings, both locally and nationally, are for positions that do not require a college degree. While education reform rhetoric endlessly extols “college and career readiness,” job projections by the Hawai‘i Department of Labor show that, overall, more than 72 percent of the state’s projected openings through 2022 require a high school diploma or less. For comparison, about 15 percent of future openings require a bachelor’s degree and only 4 percent require a master’s, doctoral, or professional degree.
Hawai‘i’s CTE offerings must be expanded, then, to allow young people to design their own futures, and provide them with a multitude of opportunities in a variety of future careers.

According to a national study, only 25 percent of polled job seekers reported receiving career pathing in high school, however, with 41 percent saying that they wished they had received more vocational guidance. Careers taught through the state’s CTE program—from automotive technology to environmental management to digital media—are at the cutting edge of our local economy, requiring real-world skills that students and employers desire, and that the College Career Readiness paradigm too often fails to advance.

Vocational training should be a viable alternative to college, which is increasingly cost prohibitive for high school graduates and their families. One way of increasing participation in CTE programming is to require the department of education to allow students to attend a high school that offers a CTE program they desire, even if the student does not live in that school’s designated geographical area which would allow the 44 percent of Hawai‘i high school graduates who do not seek post-secondary education to receive industry based skills and certifications required to join the 21st Century job market. Not every school can or should offer culinary arts, auto mechanics, or agricultural tech programs, but when they do offer specific vocational programs, our students, regardless of where they live in Hawaii should be allowed to enroll in these programs in the high school that offers them when these programs match a student’s interests and future goals.

To prepare students to become members of the modern workforce, the Hawaii State Teachers Association asks your committee to support this bill.
