Comments:

Aloha Chair Nishihara, Chair Keohokalole and members,

What a good idea. I and those in my Mililani Neighborhood, including our Neighborhood Board, have long sought sane regulation of fireworks. A good law was passed but the illegal aerals and big explosives were the worst this past New Year's Eve than any in our collective memories.

Law enforcement needs this extra tool to catch these thoughtless perpetrators of dangerous and intrusive fireworks.

Please pass this bill. Mahalo, Ann S. Freed, Mililani

Comments:

This will cost A LOT of money. Placement of the "detection sensors" may be a heated discussion with the community. When I compare the cost of this wonderful technology to what it will be used for (illegal fireworks, very few gunfire incidents) it seems hard to justify the cost.

Honolulu, Hawaii 96813

Dear Chairs Nishihara and Keohokalole and Members:

SUBJECT: Senate Bill No. 2406, Relating to Explosion Detection Technology

I am Kim McCumsey, Lieutenant of the Communications Division of the Honolulu Police Department (HPD), City and County of Honolulu.

The HPD opposes Senate Bill No. 2406, Relating to Explosion Detection Technology.

There are many companies that have similar explosion detection technology products on the market and it will take time to research a suitable one for the HPD. The HPD will need to determine if such a system would be feasible to its operations. Other stakeholders, such as the City's Department of the Prosecuting Attorney and the Hawaii State Department of the Attorney General, will need to be consulted to determine how the system will be used for criminal investigations and prosecution. In addition, the time frame to purchase and train police officers to use such a system is not reasonable, as the HPD needs to abide by the City and County of Honolulu's procurement process.

Thank you for the opportunity to testify.
