A BILL FOR AN ACT

RELATING TO SELF-SUFFICIENCY.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

SECTION 1. The legislature finds that a self-sufficiency standard that is measured appropriately and updated consistently for the State of Hawaii would much more accurately reflect the actual income needed to afford the basic necessities of life.

In 2003, a study conducted for the Hawaii state commission on the status of women calculated the bare-minimum costs for housing, child care, food, transportation, health care, clothing and household costs, and federal and state tax obligations. The result was a measurement of the cost of living in Hawaii that took into account family size, children's ages, geography, and number of household wage-earners. The study found that certain households in Hawaii could require as much as double to triple the amount listed in the federal poverty guidelines to meet their basic living needs. A self-sufficiency standard for Hawaii would be an excellent tool for lawmakers, the business and education communities, and the nonprofit sector to improve
efforts to help lower-income families reach economic sufficiency.

The purpose of this Act is to establish and update biennially a self-sufficiency standard for Hawaii.

SECTION 2. Section 201-3, Hawaii Revised Statutes, is amended to read as follows:
