
SENATE CONCURRENT RESOLUTION

REQUESTING THE DEPARTMENT OF TAXATION TO CONDUCT AUDITS OF THE
PRODUCERS OF LIQUID FUEL FOR THEIR COMPLIANCE IN REPORTING
THE ENVIRONMENTAL RESPONSE TAX AND LIQUID FUEL LICENSE TAX.

1 WHEREAS, section 243-3.5, Hawaii Revised Statutes, imposes
2 a state environmental response tax of "5 cents on each barrel or
3 fractional part of a barrel of petroleum product sold by a
4 distributor to any retail dealer or end user, other than a
5 refiner, of petroleum product"; and
6

7 WHEREAS, the federal government and other states have
8 similar laws that impose a tax to address oil spills and other
9 environmental issues; and
10

11 WHEREAS, Internal Revenue Service *Publication 510 (2008)*,
12 *Excise Taxes: Part Two, Excise Taxes Other Than Fuel Taxes*,
13 states that no one is exempt from the federal environmental
14 taxes; and
15

16 WHEREAS, our State's law is supposedly mirrored after the
17 federal law; and
18

19 WHEREAS, chapter 128D, Hawaii Revised Statutes, that is
20 referenced in section 243-3.5, Hawaii Revised Statutes, was
21 enacted to support the State's responsibilities under the
22 Federal Emergency Planning and Community Right-to-Know Act; and
23

24 WHEREAS, for the implementation of the tax, section 243-1,
25 Hawaii Revised Statutes, defines pertinent terms as follows:
26

27 (1) "Barrel" means "forty-two United States gallons of
28 crude oil or petroleum product";
29

30 (2) "Petroleum product" means "any liquid hydrocarbon at
31 standard temperature and pressure that is the product

1 of the fractionalization, distillation, or other
2 refining or processing of crude oil";

3
4 (3) "End user" means "any person or government entity who
5 acquires petroleum products for their own use and not
6 for resale"; and
7

8 (4) "Retail dealer" means "a person who purchases liquid
9 fuel from a licensed distributor, and sells the liquid
10 fuel at retail. Only sales of liquid fuel for
11 consumption or used by the purchaser, and not for
12 resale, are sales at retail"; and
13

14 WHEREAS, the statutes clearly indicate that the
15 environmental response tax is intended to be imposed on each
16 forty-two-gallon barrel of "liquid hydrocarbon" that is the
17 product of the "refining or processing" of "crude oil" and sold
18 to a "retail dealer" or "end user"; and
19

20 WHEREAS, publicly available data, however, appear to
21 display some discrepancies in the tax collections; and
22

23 WHEREAS, for example, data from the Department of Taxation
24 for 2008 show that the environmental response tax generated
25 \$1,695,000 on a tax base of 33,909,000 barrels of petroleum
26 products; and
27

28 WHEREAS, multiplying the 33,909,000 barrel tax base by
29 forty-two gallons results in a product of 1,424,178,000 gallons;
30 and
31

32 WHEREAS, the same data from the Department of Taxation,
33 however, show that the liquid fuel license tax base was
34 997,200,000 gallons in 2008; and
35

36 WHEREAS, the difference is substantial, suggesting that
37 either the environmental response tax was over-collected or the
38 liquid fuel tax was under-collected; and
39

40 WHEREAS, data for 2005 also raise a question about the
41 environmental response tax collection:
42

43 (1) According to the Department of Taxation, the
44 environmental response tax base in 2005 was 36,200,000

1 barrels of petroleum products in forty-two gallon
2 barrels;

3
4 (2) According to the Department of Business, Economic
5 Development, and Tourism, 51,262,000 barrels of
6 petroleum in fifty-five gallon barrels were imported
7 into the State;

8
9 (3) Some of the imported petroleum was refined into non-
10 liquid products or refined into liquid products and
11 then exported, thereby excluding those barrels from
12 the environmental response tax; and
13

14 (4) Nevertheless, the difference between the data is very
15 large, and the reason for the difference requires
16 examination; and
17

18 WHEREAS, thus, the Legislature finds that audits of the
19 producers of liquid fuel for their compliance in reporting the
20 environmental response tax and liquid fuel license tax should be
21 conducted; now, therefore,
22

23 BE IT RESOLVED by the Senate of the Twenty-fifth
24 Legislature of the State of Hawaii, Regular Session of 2009, the
25 House of Representatives concurring, that the Department of
26 Taxation is requested to audit those taxpayers that are required
27 to voluntarily report information regarding the environmental
28 response tax and the liquid fuel license tax to determine their
29 compliance in reporting such information; and
30

31 BE IT FURTHER RESOLVED that the Department of Taxation is
32 requested to submit the results of such audits to the
33 Legislature at least twenty days before the convening of the
34 Regular Session of 2010; and
35

36 BE IT FURTHER RESOLVED that a certified copy of this
37 Concurrent Resolution be transmitted to the Director of
38 Taxation.
