Testimony to Support Increasing Asset Limit for Supplement Nutrition Assistance Program (SNAP) formerly Food Stamps (SB1668)

Having to know people with food stamps and are in need of it, I will support this bill all the way. I believe that people are in need for certain reasons for example having to work and take care of the five children at home, but working doesn't put food on the table. With the support of increasing the limit with surely help the people that are in need. Helping the disabled is probably the best thing that is happening to them, now that they can not work and support for themselves SNAP is helping them get that food on the table. Many times this is what many people rely on to help then in purchasing food for themselves and their families.

I will support this Bill in any way that I can. I strongly believe that this helps many people with families or with no families and people that are disabled. I also believe that if the person/persons are eligible for the assistance there should be no problems. As long as the person can qualify there is no doubt that the person will get the assistance. Having to determine what the amount for the assistance, I support that part too. So for ever how much a person has in their family that's the amount they will get. Also the amount is also determined by the percentage of the standard need, which I support because if a person has three people in the family they should not get assistance with a high amount versus a family that has more than five members. I support the SB1668 Bill.

Mahalo,
