
A BILL FOR AN ACT

RELATING TO DENTAL HEALTH.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that most states are not
2 doing enough to prevent tooth decay, unnecessarily driving up
3 health care costs for families and taxpayers. A new report by
4 the Pew Center on the States, *Falling Short: Most States Lag on*
5 *Dental Sealants*, grades all fifty states on their efforts to
6 prevent decay by improving access for low-income children to
7 sealants, clear plastic coatings applied to the chewing surfaces
8 of molars. In the report, states were graded based on four
9 indicators: having sealant programs in high-need schools;
10 allowing hygienists to place sealants in school-based programs
11 without requiring a dentist's exam; collecting data regularly
12 about the dental health of schoolchildren and submitting it to
13 the national oral health surveillance system; and meeting a
14 national objective on sealants set by the federal government's
15 Healthy People 2010 goals.

16 Hawaii was one of only five states to receive a grade of
17 "F", with a total of one out of eleven possible points. An "F"
18 grade indicates that a state is lagging far behind in prevention

1 efforts and could be doing more to reduce pain and costs
2 associated with dental problems. Research shows that providing
3 dental sealants through school-based programs is a cost-
4 effective way to reach low-income children, who are at greater
5 risk of tooth decay.

6 The legislature further finds that school-based dental
7 sealant programs provide sealants to children who are least
8 likely to receive them otherwise. Studies have shown that tooth
9 decay of molars dropped an average of sixty per cent up to five
10 years after sealant application in a school program. Sealants
11 also prevent decay at one-third the expense of filling a cavity.

12 States wishing to establish a school-based sealant program
13 must also explore potential funding avenues. Some states with
14 school-based dental sealant programs, such as Ohio, receive
15 funding through the federal Maternal and Child Health Block
16 Grant. Other funding possibilities may also be available,
17 including program-generated revenue through collections from
18 medicaid. The legislature notes that medicaid currently covers
19 sealants for eligible recipients in Hawaii.

20 The legislature additionally finds that the Pew Center on
21 the States report noted that Hawaii was one of eight states with
22 the most restrictions on dental hygienists, the primary

1 practitioners who apply sealants in school-based programs.
2 Removing unnecessary restrictions on dental hygienists will
3 eliminate expensive and unnecessary barriers to serving children
4 in school-based sealant programs.

5 The legislature finds that the State must take proactive
6 steps to make prevention of tooth decay among Hawaii's children
7 a top priority.

8 Accordingly, the purpose of this Act is to:

- 9 (1) Require the director of health to participate in the
10 national oral health surveillance system, a national
11 database managed by the federal Centers for Disease
12 Control and Prevention and the Association of State
13 and Territorial Dental Directors;
- 14 (2) Permit dental hygienists to apply preventative
15 sealants, in consultation with a licensed dentist, at
16 federally qualified health centers and in school-based
17 dental sealant programs;
- 18 (3) Require the department of health to establish and
19 administer a school-based dental sealant program in a
20 high-need demonstration school;
- 21 (4) Require the department of health to report to the
22 legislature about the department's efforts to

1 prioritize prevention of tooth decay among the State's
2 children; and

3 (5) Appropriate funds to establish and administer a
4 school-based dental sealant program in a high-need
5 demonstration school, including plans to implement the
6 program on a statewide level.

7 SECTION 2. Section 321-63, Hawaii Revised Statutes, is
8 amended to read as follows:

9 "**§321-63 Director's specific duties and powers.** To carry
10 out the purposes of this part, the director of health shall:

11 (1) Take such action as may be necessary, and authorized
12 by law, to meet conditions prescribed for
13 participation in all related federal dental health
14 programs and the regulations adopted thereunder;
15 determine qualifications of personnel requiring
16 professional training and licenses and correlate the
17 programs of the department with the profession and
18 related agencies for the proper and efficient
19 functioning of the department;

20 (2) Enter into cooperative arrangements with other
21 departments, agencies, and institutions, public or
22 private;

- 1 (3) Participate in the national oral health surveillance
2 system, a national database managed by the federal
3 Centers for Disease Control and Prevention and the
4 Association of State and Territorial Dental Directors;
- 5 [~~3~~] (4) Submit plans relating to dental health to the
6 United States Public Health Service and make
7 application for such federal funds as will assist in
8 carrying out the purposes of this part;
- 9 [~~4~~] (5) Accept on behalf of the State and deposit with
10 the director of finance any grant, gift, or
11 contribution from the federal government or other
12 source made to assist in meeting the cost of carrying
13 out the purposes of this part and expend the same for
14 such purposes; and
- 15 [~~5~~] (6) Make an annual report on activities and
16 expenditures pursuant to this part, including
17 recommendations for additional plans, measures, or
18 legislation relating to the purposes of this part."

19 SECTION 3. Section 447-3, Hawaii Revised Statutes, is
20 amended by amending subsection (b) to read as follows:

21 "(b) Clinical dental hygiene may be practiced by a
22 licensed dental hygienist. The practice of clinical dental

1 hygiene is defined as the removal of hard and soft deposits and
2 stains from the portion of the crown and root surfaces to the
3 depth of the gingival sulcus, polishing natural and restored
4 surfaces of teeth, the application of preventive chemical agents
5 to the coronal surfaces of teeth, which chemical agents have
6 been approved by the board of dental examiners, and the use of
7 mouth washes approved by the board, but shall not include the
8 performing of any repair work or the preparation thereof, or any
9 other operation on the teeth or tissues of the mouth; provided
10 that nothing in this subsection shall prohibit a dental
11 hygienist from using or applying topically any chemical agent
12 which has been approved in writing by the department of health
13 for any of the purposes set forth in part V of chapter 321[7];
14 provided further that nothing in this subsection shall prohibit
15 a dental hygienist from applying preventative sealants, in
16 consultation with a licensed dentist, in a school-based dental
17 sealant program established pursuant to Act _____, Session Laws
18 of Hawaii 2013, or at a federally qualified health center; and
19 other procedures delegated by a dentist in accordance with the
20 rules of the board of dental examiners.

21 In addition, a licensed dental hygienist may administer
22 intra-oral infiltration local anesthesia and intra-oral block

1 anesthesia under the direct supervision of a dentist after being
2 certified by the board, and for those categories of intra-oral
3 infiltration local anesthesia and intra-oral block anesthesia
4 for which the licensed dental hygienist has been certified
5 through a course of study meeting the requirements of this
6 chapter."

7 SECTION 4. (a) The department of health shall establish
8 and administer a school-based dental sealant program in a high-
9 need demonstration school to provide sealants to high-risk
10 students with susceptible permanent molar teeth.

11 (b) The department of health shall consult with the
12 department of education; department of human services, med-QUEST
13 division; federally qualified health centers; community health
14 centers; and members of the oral health community in
15 establishing and administering the program. A needs assessment
16 shall be conducted to determine what area of the State would
17 best serve as the location of the demonstration school. The
18 needs assessment may include considerations related to
19 geographic area; target population, including income level and
20 school grade; and the number of students eligible for the
21 program.

1 (c) The department of health shall establish a plan for a
2 statewide school-based dental sealant program and submit
3 applications for any federal funds that may be available for the
4 program.

5 (d) The department of health shall submit a report to the
6 legislature no later than twenty days prior to the convening of
7 the regular session of 2015. The report shall detail the
8 department's efforts to prioritize prevention of tooth decay
9 among the State's children, including:

- 10 (1) Progress in implementing the school-based dental
11 sealant program at the demonstration school;
- 12 (2) Strategies and goals associated with implementing a
13 statewide school-based dental sealant program;
- 14 (3) Steps taken to secure funding and sustainability of
15 the statewide school-based dental sealant program;
- 16 (4) The department's plan to meet the United States
17 Department of Health and Human Services' Healthy
18 People 2010 oral health objective 21-8, which calls
19 for fifty per cent of the State's eight-year-old and
20 fourteen-year-old children to have sealants on their
21 permanent molar teeth; and

1 (5) Any recommendations, including proposed legislation,
2 needed to implement the statewide school-based dental
3 sealant program.

4 SECTION 5. There is appropriated out of the general
5 revenues of the State of Hawaii the sum of \$ or so much
6 thereof as may be necessary for fiscal year 2013-2014 and the
7 same sum or so much thereof as may be necessary for fiscal year
8 2014-2015 for the department of health to establish and
9 administer a school-based dental sealant program in a high-need
10 demonstration school, including plans to implement the program
11 on a statewide level.

12 The sums appropriated shall be expended by the department
13 of health for the purposes of this Act.

14 SECTION 6. In printing this Act, the revisor of statutes
15 shall insert in section 3 of this Act the corresponding Act
16 number of this Act.

17 SECTION 7. Statutory material to be repealed is bracketed
18 and stricken. New statutory material is underscored.

19 SECTION 8. This Act shall take effect on January 1, 2054;
20 provided that it shall be repealed on January 1, 2057.

Report Title:

Dental Hygienists; School-based Dental Sealant Program

Description:

Permits dental hygienists to apply preventative sealants, in consultation with a licensed dentist, in a school-based dental sealant program or federally qualified health center. Requires the Department of Health to establish and administer a school-based dental sealant program in a high-need school. Appropriates funds. Effective January 1, 2054. Repealed on January 1, 2057. (SB343 HD1)
