
A BILL FOR AN ACT

RELATING TO THE ELDERLY.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The nation-wide trend toward an aging
2 population is evident in Hawaii. Projections estimate that by
3 2030 the elderly population will represent twenty per cent of
4 the populations for each county, as well as the state as a
5 whole: one out of every five individuals statewide will be aged
6 sixty-five or older.

7 Age is the single most important factor influencing health
8 status and the need and demand for health care resources. For
9 the elderly, there is a clear relationship between age and
10 mortality, prevalence of chronic conditions, and level of
11 disability. Accordingly, the elderly are the heaviest users of
12 health care resources.

13 In Hawaii, grandparents often provide child care for their
14 young grandchildren and frequently take their grandchildren to
15 playgrounds. Establishing senior playgrounds near children's
16 playgrounds is a trend that is being used by an increasing
17 number of states to keep elderly individuals healthy. Senior

1 playgrounds designed as fitness parks to keep seniors active and
2 reduce their propensity to fall by providing a means to work on
3 balance and dexterity address many health needs of older
4 individuals. These fitness parks offer opportunities for active
5 exercise and serve as preventative care to the propensity for
6 falls, which, alone, are estimated to represent \$19,000,000,000
7 in annual health care costs, a number expected to increase to
8 \$55,000,000,000 by 2020.

9 The purpose of this Act is to establish a three-year senior
10 playground pilot program to address the health needs of a
11 growing elderly population.

12 SECTION 2. (a) The executive office on aging, in
13 consultation with the department of health, county departments
14 of parks and recreation or similar county agencies, elderly
15 service providers, and other appropriate entities, shall
16 establish a three-year senior playground pilot program.

17 (b) Taking into account proximity to existing playgrounds,
18 the senior playground pilot program shall work with county
19 departments of parks and recreation or similar county agencies,
20 as well as elderly service providers, to determine the best
21 possible locations and design for senior playgrounds.

1 (c) The executive office on aging may contract with
2 provider agencies to implement the senior playground pilot
3 program. The department of health and other state agencies
4 shall assist the executive office on aging and any provider
5 agencies contracted for the senior playground pilot program to
6 identify, contract, and convey land and improvements available
7 for use for the pilot program.

8 (d) The senior playground pilot program shall first
9 establish at least one senior playground in a single county;
10 provided that the number of senior playgrounds may be increased
11 and expanded to other counties as determined by the executive
12 office on aging, in consultation with the department of health,
13 county departments of parks and recreation or similar county
14 agencies, and elderly service providers.

15 (e) The counties shall make any amendments or exemptions
16 to their respective ordinances, rules, or plans relating to
17 planning, zoning, construction standards, development and
18 improvement of land, and building construction that are
19 necessary to implement the senior playground pilot program in a
20 safe, cost-effective manner.

1 SECTION 3. The executive office on aging, in consultation
2 with the department of health, shall submit a progress report of
3 the senior playground pilot program to the legislature no later
4 than twenty days prior to the convening of the 2016, 2017, and
5 2018 regular sessions. After the final year of the senior
6 playground pilot program, a final report shall be submitted to
7 the legislature no later than twenty days prior to the convening
8 of the regular session of 2019, to include:

- 9 (1) Total number of locations of the senior playground
10 pilot program;
- 11 (2) Initial costs of the program, including plan, design,
12 and construction costs;
- 13 (3) Annual costs of the program including information on
14 the durability of senior playground equipment and
15 repair and maintenance costs of the senior
16 playgrounds;
- 17 (4) Liability issues associated with the senior
18 playgrounds, if any;
- 19 (5) Recommendations regarding the continuation or
20 expansion of the senior playground pilot program
21 including estimated costs to plan, design, construct,

1 and maintain any additional playgrounds, as well as
2 the counties in which the additional playgrounds will
3 be established;

4 (6) Recommendations to incorporate the senior playground
5 pilot program in the Hawaii state plan on aging; and

6 (7) Recommendations regarding any necessary legislation
7 for the continuation or expansion of the senior
8 playground pilot program.

9 SECTION 4. There is appropriated out of the general
10 revenues of the State of Hawaii the sum of \$ or so much
11 thereof as may be necessary for fiscal year 2015-2016 for the
12 senior playground pilot program.

13 The sum appropriated shall be expended by the executive
14 office on aging for the purposes of this Act.

15 SECTION 5. This Act shall take effect on July 1, 2050, and
16 shall be repealed on June 30, 2019.

Report Title:

Seniors; Executive Office on Aging; Playgrounds; Appropriation

Description:

Requires the Executive Office on Aging to establish a three-year senior playground pilot program within the executive office on aging. Requires reports to the Legislature. Appropriates funds. Repealed June 30, 2019. (HB763 HD1)
