
SENATE CONCURRENT RESOLUTION

REQUESTING THE DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT, AND
TOURISM TO REPORT TO THE LEGISLATURE ON HOW TO INCORPORATE
RENEWABLE FUELS INTO THE HAWAII CLEAN ENERGY INITIATIVE.

1 WHEREAS, eighty percent of Hawaii's energy comes from
2 imported fuel, and fossil fuels are particularly damaging to the
3 environment; and

4
5 WHEREAS, the Hawaii Clean Energy Initiative, launched in
6 2008, is a partnership between the State and the United States
7 Department of Energy that brings together business leaders,
8 policy makers, and concerned citizens committed to leading
9 Hawaii to energy independence; and

10
11 WHEREAS, in 2008, Hawaii had a renewable portfolio standard
12 of 9.4 percent, which has increased substantially since then,
13 but is still a long way off from the goal of a one hundred
14 percent renewable portfolio standard by 2045; and

15
16 WHEREAS, petroleum use in the State's transportation sector
17 accounts for two-thirds of the State's overall energy usage; and

18
19 WHEREAS, hydrocarbons are the most energy-dense way to
20 store and transport energy, meaning renewable hydrocarbons like
21 biofuels, which are derived from crops that can be harvested and
22 regrown annually, will be a critical component of achieving the
23 Hawaii Clean Energy Initiative's goal of one hundred percent
24 renewable energy by 2045; and

25
26 WHEREAS, one-third of the State's petroleum usage is by the
27 commercial aviation sector, meaning the development of biojet
28 fuel technologies is an important aspect to establishing and
29 maintaining a robust biofuel portfolio in Hawaii; and
30

1 WHEREAS, biofuel is produced as part of an integrated food,
2 fuel, energy, and recycling system; and
3

4 WHEREAS, environmental concerns about wastewater, trash,
5 and agricultural waste can be assuaged with the development and
6 advancement of biofuel technology, as these types of waste are
7 critical biofuel feedstock opportunities; and
8

9 WHEREAS, reliable biofuel energy available on demand helps
10 support other renewable energy sources like wind and solar
11 energy, when there is no wind or sun; and
12

13 WHEREAS, Act 202, Session Laws of Hawaii 2016, established
14 a renewable fuels production tax credit to encourage the
15 production of renewable fuels; now, therefore,
16

17 BE IT RESOLVED by the Senate of the Twenty-ninth
18 Legislature of the State of Hawaii, Regular Session of 2018, the
19 House of Representatives concurring, that the Department of
20 Business, Economic Development, and Tourism is requested to
21 evaluate how renewable fuels, including biogas and gases from
22 renewable and sustainable sources, can play a role in achieving
23 the Hawaii Clean Energy Initiative's goal of one hundred percent
24 renewable energy by 2045; and
25

26 BE IT FURTHER RESOLVED that the Department of Business,
27 Economic Development, and Tourism is requested to submit a
28 report of its findings and recommendations, including any
29 proposed legislation, to the Legislature no later than twenty
30 days prior to the convening of the Regular Session of 2019; and
31

32 BE IT FURTHER RESOLVED that certified copies of this
33 Concurrent Resolution be transmitted to the Director of
34 Business, Economic Development, and Tourism; Executive
35 Management Team of the Hawaii Clean Energy Initiative; and
36 Chairperson of the Advisory Board of the Hawaii Clean Energy
37 Initiative.
