SENATE RESOLUTION

REQUESTING THE DEPARTMENT OF HEALTH, UNIVERSITY OF HAWAII, AND OTHER RELEVANT STATE AGENCIES TO CONDUCT A STATEWIDE DNA STUDY TO DETERMINE WHETHER RESIDENTS OF THE STATE WITH THE GENETIC VARIANT RS12252-C MAY BE AT A HEIGHTENED RISK OF INFLUENZA.

1 WHEREAS, influenza, or the flu, is the most frequent cause
2 of death from a vaccine-preventable disease in the United
3 States; and

4
5 WHEREAS, in 2018, the flu epidemic was widespread and
6 contributed to many deaths, particularly to those in high-risk
7 populations; and

8
9 WHEREAS, DNA research has identified a genetic marker that
10 may increase the risk of influenza infection in persons of Asian
11 and Pacific Island ancestry; and

12
13 WHEREAS, nearly two-thirds of Hawaii's resident population
14 claims such ancestry; and

15
16 WHEREAS, it is in the best interest of the State to protect
17 high-risk residents against the potentially deadly influenza
18 virus; now, therefore,

19
20 BE IT RESOLVED by the Senate of the Thirtieth Legislature
21 of the State of Hawaii, Regular Session of 2019, that the
22 Department of Health, University of Hawaii, and other relevant
23 state agencies are requested to conduct a statewide DNA study to
24 determine whether residents of the State with the genetic
25 variant rs12252-C may be at a heightened risk of influenza; and

26
27 BE IT FURTHER RESOLVED that findings of the DNA study be
28 utilized to advance statewide pandemic influenza mitigation
29 planning; and

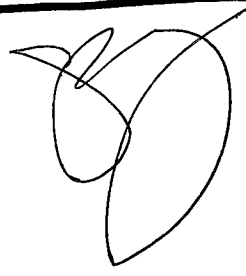

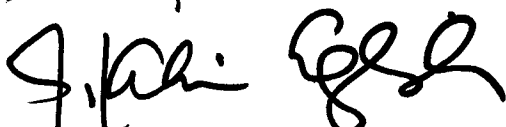

30
31 BE IT FURTHER RESOLVED that certified copies of this
32 Resolution be transmitted to the Director of Health, Chairperson

S.R. NO. 128

1 of the Board of Regents of the University of Hawaii, and
2 President of the University of Hawaii.
