
A BILL FOR AN ACT

RELATING TO CABLE TELEVISION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that access to television
2 service is critical in today's current events-driven world, and
3 a lack of access to this service places a unique burden and
4 hardship upon the residents of the State.

5 Additionally, the legislature finds that requiring cable
6 operators to offer cable service in areas that have twenty-five
7 homes in a linear mile provides residents in these areas with
8 the access necessary to sustain the needs and uses of those
9 residents.

10 The legislature further finds that due to the proliferation
11 of providers offering the same types of services, this
12 requirement should not apply where cable service is already
13 available on a competitive basis from other providers.

14 The purpose of this Act is to:

15 (1) Remove the requirement that the director of commerce
16 and consumer affairs take into account the present,
17 planned, and potential expansion in facilities or

1 cable services of an applicant's proposed cable system
2 and existing cable systems; and

3 (2) Require a cable operator to make available cable
4 services in areas that have twenty-five homes per
5 linear mile of the cable operator's distribution plant
6 unless cable service is available from at least
7 other cable operators or any other
8 multichannel video programming distributors in those
9 areas.

10 SECTION 2. Section 440G-8, Hawaii Revised Statutes, is
11 amended to read as follows:

12 "**§440G-8 Issuance of cable franchise authority; criteria;**
13 **content.** (a) The director is empowered to issue a cable
14 franchise to construct or operate facilities for a cable system
15 upon the terms and conditions provided in this chapter.

16 (b) The director, after a public hearing as provided in
17 this chapter, shall issue a cable franchise to the applicant
18 when the director is convinced that it is in the public interest
19 to do so. In determining whether a cable franchise shall be
20 issued, the director shall take into consideration, among other
21 things, the content of the application or proposal, the public

1 need for the proposed service, the ability of the applicant to
 2 offer safe, adequate, and reliable service at a reasonable cost
 3 to the subscribers, the suitability of the applicant, the
 4 financial responsibility of the applicant, the technical and
 5 operational ability of the applicant to perform efficiently the
 6 service for which authority is requested, any objections arising
 7 from the public hearing, the cable advisory committee
 8 established by this chapter, or elsewhere, and any other matters
 9 as the director deems appropriate in the circumstances.

10 (c) In determining the area which is to be serviced by the
 11 applicant, the director shall take into account the geography
 12 and topography of the proposed service area [~~and the present,~~
 13 ~~planned, and potential expansion in facilities or cable services~~
 14 ~~of the applicant's proposed cable system and existing cable~~
 15 ~~systems]~~.

16 (d) In carrying out its duties under this section, the
 17 director shall require a cable operator to make cable service
 18 available to any residence within the cable operator's service
 19 area located in a portion of the area where there is a minimum
 20 density of at least twenty-five homes per linear mile of
 21 distribution plant, as measured from the cable operator's

1 closest technologically feasible tie-in point that is actively
2 delivering cable service and excluding any residences already
3 passed by the distribution plant; provided that the director
4 shall not apply the service deployment requirement threshold
5 authorized under this subsection, or any other service
6 deployment threshold or line extension requirement set forth in
7 a cable franchise in effect on the date of enactment of this
8 subsection, to any portion of a cable operator's service area
9 where service is available from at least _____ cable
10 operators or any other multichannel video programming
11 distributors, as defined in title 47 United States Code section
12 522(13), that owns or utilizes equipment in the public right of
13 way, including but not limited to wireline infrastructure, to
14 deliver video programming or any video programming service
15 through a multichannel video programming distributor. Nothing
16 in this section shall be construed to limit or restrict a cable
17 operator's business discretion to serve any residence within its
18 service area.

19 [~~(d)~~] (e) In issuing a cable franchise under this chapter,
20 the director is not restricted to approving or disapproving the
21 application or proposal but may issue it for only partial

1 exercise of the privilege sought or may attach to the exercise
2 of the right granted by the cable franchise terms, limitations,
3 and conditions which the director deems the public interest may
4 require. The cable franchise shall be nonexclusive, shall
5 include a description of the service area in which the cable
6 system is to be constructed, extended, or operated and the
7 approximate date on which the service is to commence and shall
8 authorize the cable operator to provide service for a term of
9 fifteen years."

10 SECTION 3. Statutory material to be repealed is bracketed
11 and stricken. New statutory material is underscored.

12 SECTION 4. This Act shall take effect on July 1, 2050.

Report Title:

Cable Television; Cable Operators; Required Cable Service; DCCA

Description:

Amends the factors the director of commerce and consumer affairs must consider when determining whether cable service should be made available upon a new application of a cable franchise. Requires that the director require cable operators make cable service available to residences in their service area where there is a minimum density of at least twenty-five homes per linear mile, except when service is available from an unspecified number of other cable operators. Effective 7/1/2050. (HD1)
