A BILL FOR AN ACT

RELATING TO HEALTH.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

PART I

SECTION 1. The legislature finds that there are currently more than 238,000 Hawaii residents sixty years of age or over. This population constitutes 18.7 per cent of Hawaii's total population. By 2030, people sixty years of age or older are projected to increase to more than 27.4 per cent of the population. Hawaii's total population is expected to grow by twenty-one per cent between 2000 and 2030. However, the number of adults sixty years of age or older will increase by 93.8 per cent and those eighty-five years of age or older will increase by 174.7 per cent during the same period. The legislature further finds that there is a "silver tsunami" coming, with even more individuals entering their senior years and retirement.

The recession of 2007 removed the possibility of a comfortable retirement for many of Hawaii's elderly, and once seniors are no longer able to work or are employable, there is no safety net to keep retired Hawaii residents out of
homelessness. In the next ten years, the "silver tsunami" will substantially affect the entire State and the healthcare system. The legislature finds that essential policies must be enacted to address the issues relating to the increasing number of elderly and disabled persons.

The purpose of this Act is to create and establish various policies to adequately address the various issues concerning the elderly and disabled and the community healthcare industry while ensuring consumer protection for Hawaii's elderly and disabled.
