A BILL FOR AN ACT

RELATING TO CHARTER SCHOOLS.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

SECTION 1. The legislature finds that there are nearly twelve thousand students enrolled in the thirty-seven public charter schools operating under the governance of the public charter school commission and the board of education. The majority of charter school funding is provided on a non-facility general fund per-pupil basis, calculated from the sum of certain general fund non-facility operating appropriations to the department of education and each charter school's pro rata enrollment compared to the total public education enrollment. Charter school non-facility general fund per-pupil funding has been $6,846, $7,089 and $7,323 in school years 2015-2016, 2016-2017, and 2017-2018, respectively. Charter schools use this funding to pay for a wide range of school-related expenses, such as for teachers and administrative staff, school facilities, meal service, and student transportation. Notably, a significant amount of charter schools' expenses may not be borne by schools operated under the department of education.
Accordingly, while the non-facility general fund per-pupil funding provided to charter schools has increased each year, charter school operational costs continue to rise, and gaps continue to remain between public charter schools and schools under the operation of the department of education. As the public charter school commission's 2019-2023 Strategic Vision and Plan explains, "[f]unding gaps continue in per pupil allocation, facilities, payroll, transportation and food services, causing charter schools to use already meager per pupil allocation to provide basic services that are provided through centralized services by the Departments of Education (DOE), Accounting and General Services (DAGS) and Department of Transportation (DOT) for other public schools."

The legislature further finds that the potential disparity in per-pupil funding for food services is particularly concerning. The department of education's 2017-2018 Strive HI Performance System results show that a majority of public charter school students meet the poverty threshold for free or reduced lunch; however, many charter schools report that they are unable to access National School Lunch Program subsidies for a number of reasons. As a result, these schools must either ask
students to bring their own lunch or purchase lunch from a vendor or provide lunch to students at the free or reduced rate and waive the subsidy, neither of which is satisfactory or fair to the schools and their students.

The board of education has recognized the importance of the State's public charter schools as an integral component of public education strategy, and its Education Strategic Plan 2017-2020 describes shared objectives for equity and excellence for every child across Hawaii's nearly three hundred public schools, including the State's public charter schools. Despite these objectives, some public charter schools continue to be forced to require their students to provide their own lunch, or use the schools' non-facility general fund per-pupil funding to pay for free or reduced rate lunches for their students.

The purpose of this Act is to provide funding to the public charter school commission to allocate to public charter schools for student meal service costs.

SECTION 2. There is appropriated out of the general revenues of the State of Hawaii the sum of $ or so much thereof as may be necessary for fiscal year 2019-2020 and the same amount or so much thereof as may be necessary for
fiscal year 2020-2021 for the public charter school commission to allocate to charter schools for meal service costs, as determined by the commission.

The sums appropriated shall be expended by the public charter school commission for the purposes of this Act.

SECTION 3. This Act shall take effect on July 1, 2019.
Report Title: Charter Schools; Meal Service Costs; Appropriation

Description:
Appropriates funds to the public charter school commission to allocate to charter schools for meal service costs.
